Re: L. E. Carpenter Site  
Wharton Borough, Morris County  
Wetlands Assessment

Dear Jonathan:

Please find the enclosed responses to your comments on the L. E. Carpenter Site Wetlands Assessment dated October 15, 1992 prepared by EcoSciences, Inc. Also enclosed for your review is the updated report dated January 1993. L. E. Carpenter will be applying for a "Letter of Interpretation" pursuant to the Freshwater Wetlands Protection Act Rules (N.J.A.C. 7:A-1 et seq).

Should you have any additional comments or EcoScience's responses are not adequate, please contact me as soon as possible. Thank you for your continuing cooperation.

Sincerely,

Christina H. Purcell, Case Manager  
Bureau of Federal Case Management

Re: USEPA's Comments  
Wetlands Assessment  
L.E. Carpenter Site  
Wharton, New Jersey

Dear Mr. Anderson:

As we discussed, the following is EcolSciences' responses to the October 15, 1992 comments from the USEPA regarding EcolSciences' Wetland Assessment Report for the above-referenced site.

**Comment:** Data was only provided for three sampling points; as a result, we are unable to determine whether the assessment conforms to the methodology contained in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands. The field sheets for the other sampling points should be provided for review.

**Response:** As stated in the Wetland Assessment Report (Chapter II A. Wetland Approximation: Methodology), EcolSciences conducted the wetland investigation to determine the approximate limit of wetlands utilizing the "unified wetland delineation approach" as detailed within the Federal Manual for Identifying and Delineating Jurisdiction Wetlands as mandated by the New Jersey Freshwater Wetlands Protection Act Rules. Although only three data sheets were included as part of the Wetland Assessment Report, as part of any wetland approximation or delineation the field team is constantly evaluating soil characteristics along the wetland/upland boundary. To clarify this issue, additional wetland data sheets are included in EcolSciences' Wetland Investigation Report.

**Comment:** Wetland impacts are to be avoided or, if that is not possible, impacts must be minimized. Therefore, to complete the wetlands assessment, the report should also provide the approximate acreage of the mapped wetlands, estimates of the acreage and types of wetlands that may be capped/excavated, and a recommendation as to what mitigation measures are appropriate to compensate for the impacts to the wetlands.

**Response:** EcolSciences' conducted a wetland approximation when preparing the Wetland Assessment Report, therefore exact acreages of wetlands could not be determined. The current Wetland Investigation Report will indicate wetland location and size based on a survey of EcolSciences' wetland limit line. At this point, we can and have calculated the acreages of on-site wetlands. Based on Weston Services, Inc. "Draft Feasibility Study Report" which was the only report available to us for use in the preparation of the Wetland Assessment Report, we were unable to determine the exact acreages and types of wetlands which may be impacted during remediation. Until specific areas of wetlands impact are identified, it is difficult to determine appropriate mitigation measures to off-set wetland disturbance.

**Comment:** The scale of Figure 1 is not large enough for the figure to be useful. Specifically, Figure 1 is referenced on page 1 in regard to the site's location relative to Ross Road, Air Products and Chemicals, Inc., and Wharton Enterprises. These features are not identifiable on the map and it is even difficult to discern that the site is bordered by Washington Pond.

Similarly, the scale of Figure 2 is also too small to depict the site's relationship to wetlands identified on the U.S. Fish and Wildlife Services' National Wetlands Inventory map.

**Response:** The base maps for both Figure 1 and Figure 2 are at a scale of 1 inch = 2000 feet. The Figures themselves were enlarged to a scale of 1 inch = 1350 feet to clarify the site location without losing important details regarding the surrounding land use. However, in the Wetland Investigation Report, the surveyed wetland limit and subject property will be shown on "Plate 1" at a scale of 1 inch = 50 feet and should greatly clarify the sites boundaries.

**Comment:** On page 9, there is a statement which reads: "It should be noted that within the Morris County Soil Survey, soil mapping is based on 1971 aerial photographs; more recent development and remediation activity have decreased the areal extent of the Ridgebury and Whitman Soils" [hydric soils].

This statement gives the impression that, because previous remediation may have removed hydric soils, these soils (and presumably, associated wetlands) need not be considered further. However, if wetlands were associated with these soils, the areal extent of loss and/or disturbance should be estimated based upon existing information/reports, etc. Impacts to these lost/degraded wetlands should be considered in planning for the restoration of the site, regardless of whether they were disturbed prior to the January 1992 Wetlands Assessment. Appropriate mitigation for these wetlands losses should be determined.

Response: As stated correctly above, the soil mapping of the site is based on a 1971 aerial photograph. Over the past 20 years site conditions have been modified. However, to determine whether these modifications have resulted in the loss or disturbance of wetlands would require an extensive search of all available information regarding the site during this 20 year period. These materials could include historic site surveys, aerial photographs and discussions with construction officials who were familiar with the site during the period in question. This search process is an involved and lengthy review which was not part of EcolSciences' Scope of Services.

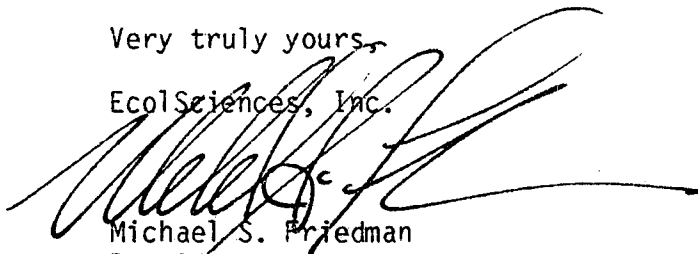

Comment: On page 10, the discussion of the herb layer in the palustrine forested wetland may be skewed by the fact that the delineation occurred in October and November. This could easily account for the "sparse herb layer". We recommend adding a statement which indicates that it is likely that the vegetation was sparse due to the timing of the delineation. As the text now reads, it gives the impression that "sparse" refers to the quality of this stratum.

Response: The term "sparse" was utilized in the Wetland Assessment Report to indicate that the herbaceous layer within the palustrine forested wetlands was limited. Most herbaceous species are persistent into the fall and early winter months. Therefore, ground cover observed in October is indicative of species which existed during the summer. The only species which may have been under-represented by a survey conducted in October/November would be the spring ephemerals.

I believe this letter addresses the USEPA's comments. EcolSciences is currently finalizing the Wetland Investigation Report and Letter of Interpretation package for this site which will be sent to you for review. If you have any other concerns regarding the enclosed, please do not hesitate to contact Laura Newgard or me.

Very truly yours,

EcolSciences, Inc.

Environmental Management & Regulatory Compliance

December 30, 1992

Mr. Robert B. Piel, Manager  
Land Use Regulation Program  
Bureau of Inland Regulation  
New Jersey Department of Environmental Protection and Energy  
CN 401  
Trenton, New Jersey 08625

Re: Letter of Interpretation  
L.E. Carpenter and Company  
Block 301, Lot 1  
Block 703, Lot 30  
Block 801, Lot 3  
Borough of Wharton  
Morris County, New Jersey

CERTIFIED MAIL

Dear Mr. Piel:

In accordance with the Freshwater Wetlands Protection Act Rules (N.J.A.C. 7:A-1 et. seq.) I would like to request a Letter of Interpretation for the above-referenced parcel. As required by Section 8.3(a) of your Rules for properties in excess of one acre, I am enclosing 3 (three) copies of the following information:

1. Owner: L.E. Carpenter and Company  
1301 E. 9th Street, Suite 3600  
Cleveland, Ohio 44114-1824

Location: Southeast of Ross Road and east of Washington Forge Pond  
Block 301, Lot 1  
Block 703, Lot 30  
Block 801, Lot 3  
Borough of Wharton  
Morris County, New Jersey

Watershed: Rockaway River Watershed  
Passaic River Basin

2. Wetland Investigation Report dated November 19, 1992 containing soils, vegetation and hydrology information as well as color photographs and Wetland Data Sheets. The Wetland Report also contains a copy of the appropriate portion of the USGS Dover, New Jersey quadrangle, the State Plane coordinates for the center of the parcel and a copy of the appropriate sheet from the County Soil Survey.
3. Survey showing wetland flag locations. Flags are marked in the field.
4. Copy of the current municipal tax map for the subject property.

5. A copy of a portion of the Morris County road map on which the subject property location is noted.
6. Written consent from L.E. Carpenter and Company allowing access onto the property.
7. A fee of \$705.00 [ $\$250.00 + \$35.00 \times 13$  acres].
8. Copy of letter to the Borough of Wharton Clerk transmitting a complete copy of the request for a Letter of Interpretation.

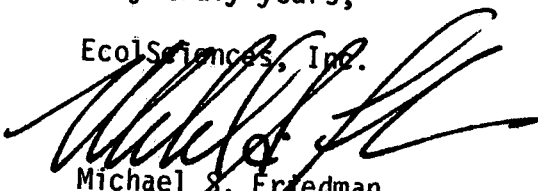

In addition to the above-referenced attachments, a certified mail notice has been forwarded to the Borough of Wharton Planning Board, Environmental Commission, and Construction official, Morris County Planning Board and property owners within 200 feet of the legal boundary line. Verification of the Certified notices and a list of property owners is attached.

The requested Letter of Interpretation is for confirmation of the wetland limits identified by EcoSciences.

Please feel free to contact Laura Newgard if you have any questions regarding this request.

Very truly yours,

EcoSciences, Inc.

CERTIFIED MAIL

Dear Ms. Best:

This letter is to provide you with legal notification that L.E. Carpenter and Company of Cleveland, Ohio is applying to the New Jersey Department of Environmental Protection and Energy, Land Use Regulation Program for a Letter of Interpretation, for Block 301, Lot 1, Block 703, Lot 30 and Block 801, Lot 3, Borough of Wharton, Morris County, New Jersey. A complete copy of the submission is enclosed.

A Letter of Interpretation is a legal document that establishes either the presence or absence or limits of wetlands, open waters or transition areas on a subject property as defined at N.J.S.A. 13:9B-1 et seq. The width of the transition area adjacent to a wetland is determined by the resource value classification of the wetland. This information is also provided by a Letter of Interpretation. If any of these features are present on a parcel, the Department will regulate many aspects of development on those areas as defined in N.J.A.C. 7:7A-1.4, Regulated activities.

The complete Letter of Interpretation application package can be reviewed at either the municipal clerk's office or by appointment at the Land Use Regulation Program office at the address listed below. The Department welcomes comments and any information that you may provide concerning the presence of wetlands, open waters or transition areas on the referenced parcel. Written comments should be submitted within 15 days of receiving this letter. Comments will be accepted until the Department makes a decision on the application. Please submit your written comments along with a copy of this letter to:

New Jersey Department of Environmental Protection and Energy  
Land Use Regulation Program  
Bureau of Inland Regulation

5 Station Plaza  
Trenton, New Jersey 08625

Attn: Morris County Section Chief

Ms. Susan Best, Clerk  
December 30, 1992  
Page 2

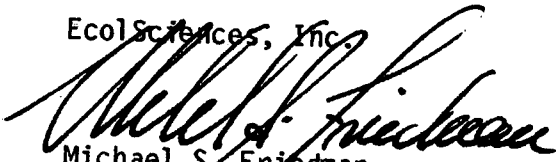

As part of the Department's review of this application, Department personnel may perform a site inspection on adjacent properties. This site inspection will involve only land within 150 feet from the applicant's property line. This site visit will involve a visual inspection and possibly minor soil borings using a 4 inch diameter hand auger. The inspection will not result in any damage to vegetation or any improvements on adjacent properties.

The Department will notify the environmental commission, the planning board of the municipality and the municipal construction official of the Department's determination in the Letter of Interpretation.

If you have any questions regarding this notice, please contact Laura Newgard of this office.

Very truly yours,

EcolSciences, Inc.

NOTICE  
THE NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION AND ENERGY  
NOTICE OF REQUEST FOR A LETTER OF INTERPRETATION

This letter is to provide you with legal notification that L.E. Carpenter and Company of Cleveland, Ohio is applying to the New Jersey Department of Environmental Protection and Energy, Land Use Regulation Program for a Letter of Interpretation for the property known as Block 301, Lot 1, Block 703, Lot 30 and Block 803, Lot 3, Borough of Wharton, Morris County, located southeast of Ross Road and east of Washington Forge Pond as indicated on the enclosed USGS map. The rules governing wetlands and transition areas are found at N.J.A.C. 7:7A.

A Letter of Interpretation is a legal document that establishes either the presence or absence or limits of wetlands, open waters or transition areas on a subject property as defined at N.J.S.A. 13:9B-1 et seq. The width of the transition area adjacent to a wetland is determined by the resource value classification of the wetland. This information is also provided by a Letter of Interpretation. If any of these features are present on a parcel the Department will regulate many aspects of development on those areas as defined in N.J.A.C. 7:7A-1.4, Regulated activities.

The complete Letter of Interpretation application package can be reviewed at either the municipal clerk's office or by appointment at the Land Use Regulation Program office at the address listed below. The Department welcomes comments and any information that you may provide concerning the presence of wetlands, open waters or transition areas on the referenced parcel. Written comments should be submitted within 15 days of receiving this letter. Comments will be accepted until the Department makes a decision on the application. Please submit your written comments along with a copy of this letter to:

New Jersey Department of Environmental Protection and Energy  
Land Use Regulation Program  
Bureau of Regulation  
CN 401, 5 Station Plaza  
Trenton, New Jersey 08625  
Attn: Morris County Section Chief

As part of the Department's review of this application, Department personnel may perform a site inspection on your property. This site inspection will involve only land within 150 feet from the applicant's property line. This site visit will involve a visual inspection and possibly minor soil borings using a 4 inch diameter hand auger. The inspection will not result in any damage to vegetation or any improvements on your property.

The Department will notify the environmental commission, the planning board of the municipality and the municipal construction official of the Department's determination in the Letter of Interpretation.

If you have any questions regarding this notice, please contact Laura Newgard of this office at (201) 366-9500.
